Discourage anhydrous ammonia theft at the farm

- Deliver tanks to the farm near the time of application
- Position delivered tanks where they can be seen from the road by patrolling police and passersby
- Encourage producers to return tanks immediately after use
- Inspect each nurse tank daily and notify law enforcement if it appears someone has tampered with a tank
- Empty tanks before storing for offseason
- Locate tanks in sight range of farm buildings

Anhydrous Ammonia Theft & the Illegal Drug Trade

What YOU need to know

Sponsored by the ~ North Dakota Insurance Department and North Dakota Attorney General new threat is lurking on the prairie—anhydrous ammonia theft. North Dakota agriculture depends on anhydrous ammonia as a major source of nitrogen fertilizer for the production of grains and other crops. But anhydrous ammonia doesn't just make for good yields—it makes methamphetamine, a powerful drug with a high potential for abuse and dependence. It kills, but you can do something about it.

What is ...?

Anhydrous ammonia is a nitrogenbased fertilizer product. With simple ingredients and an inexpensive, makeshift lab, it can be converted into ...

Methamphetamine, a powerful central nervous system stimulant. "Meth" is typically sold in powder, pill or rock form.

HIDTA is the Midwest High Intensity Drug Trafficking Area project, an affiliation of six states that receive federal funding for personnel, operating expenses and equipment to combat the methamphetamine trade.

Something missing?

How do I know if I have had anhydrous ammonia stolen?

- Tracks in mud or snow
- Disturbed ground near tanks
- Suspicious items, such as duct tape or hoses, left near tank
- Circular pattern left in snow or dirt next to tank

What don't I do now?

- Don't disturb the crime scene
- Don't confront or approach suspicious individuals near anhydrous ammonia tanks

CAUTION: Thieves may be under the influence of methamphetamine and could become violent

Then what?

Call one of the law enforcement offices listed on the back of this brochure.

What can I do about it?

Plenty. In the store or on the farm a few commonsense precautions can keep your tanks, and your children, safe.

Discourage anhydrous ammonia theft at the dealership

- Make employees and customers aware of the problem
- Store nurse tanks in well lit areas
- ◆ Inspect the tanks every morning, including weekends
- ◆ Block the dealership entry to prevent the physical theft of the tank
- Place brightly colored plastic wire ties or seals on the valve wheel and roll cage to ease visual checks
- Keep accurate records and perform frequent inventory checks
- Track stored nurse tanks by identification number; estimate the amount of remaining product
- Storage container shut-off valves <u>must</u> be locked when no-one is present*
- Work with local law enforcement on security; encourage frequent nighttime patrols
- Be alert to customers seeking to buy anhydrous ammonia who you know have no legitimate need for the product. If strangers attempt to buy anhydrous, note their physical description and that of their vehicle.
